

Compliance with BC Energy Step Code

Workshop, Demonstration and Home Tour

Join Township of Langley staff, local builders, energy advisors and other stakeholders to participate in a mid-construction blower door (MCBD) test workshop to learn how to meet and beat Step Code targets with confidence.

- **Learn about the purpose and vision** of the Step Code.
- **Understand, through practical language and home tour examples**, how the Step Code metrics used to measure the performance of the building and verify code compliance.
- **Learn about the role of energy advisors and energy modellers** in supporting builders to find the most cost effective and consumer-preferred options to meet and beat Step Code targets.
- **Understand how** the BC Energy Compliance Report is developed and used.
- **Access information about financial incentives available for building to BC Energy Step Code requirements**, including the Township of Langley incentives for mid-construction blower door testing, energy modelling, and building to Step 4 and 5.
- **Get answers** to your questions about the BC Energy Step Code and the BC Energy Compliance Report.

Wednesday, August 21, 2019

12:00pm - 3:00pm
