

High Performance Ducting Workshop

Demonstration and Home Tour

Join Township of Langley staff, local builders, energy advisors and other stakeholders to participate in a duct blast (DB) test and high performance ducting workshop to learn best practices for ventilation system design.

- **Learn about the benefits of ventilation** and the importance of integrating the ventilation early in the design process in all dwelling types.
- **Understand the advantages and limitations** of the 4 proven code-compliant systems in use today.
- **Learn how to avoid the common problems** and occupant complaints which result if things go wrong
- **Participate in a live demonstration** of a DB test in a BC Energy Step Code level 3 home.
- **Learn the key questions to ask your ventilation contractor** to ensure the installed system is effective first and efficient second.
- **Learn how to right-size your equipment** (bigger is not always better) and develop an understanding of the annual operating costs of ventilation systems.
- **Access resources to better understand ventilation system design** and function to manage moisture in a home.

Tuesday, August 20, 2019

9:00am - 12:00pm
